Contents

Foreword vii

THEORY

Light confinement in scanning near-field optical microscopy
L. Novotny, D.W. Pohl and B. Hecht 1

Reconstruction of the dielectric contrast profile from near-field data
R. Carminati and J.-J. Greffet 11

The inverse scanning tunneling near-field microscope (ISTOM) or tunnel scanning near-field optical microscope (TSNOM)3D simulations and application to nano-sources
D. Barchiesi and D. Van Labeke 17

Theory of electromagnetic energy transfer in three-dimensional structures
J.-P. Vigneron, F. Forati, D. André, A. Castiaux, I. Derycke and A. Dereux 21

Interference patterns in and outside a dielectric prism combined with a Fabry–Pérot cavity
A. Castiaux, A. Dereux, C. Girard and J.-P. Vigneron 29

Regularization in the macroscopic self-consistent model for near-field microscopy
E.A. Bozhevolnaya, S.I. Bozhevolnyi and S. Berntsen 35

Relationship between the near-field speckle pattern and the statistical properties of a surface
J.-J. Greffet and R. Carminati 43

Near-field theoretical study of a magneto-optical grating
D. Van Labeke, A. Vial and D. Barchiesi 51

Theory of Kerr effect in magnetic multilayered structures
F. Forati, A. Dereux, J.-P. Vigneron, C. Girard and F. Scheurer 57

Near-field characteristics of periodic surface relief diffraction structures from far-field measurements
I. Aubrecht, I. Koudela and M. Miler 63

The wave-mixing near field optics amplifier: a theoretical feasibility study for non-linear NFO experiments in biology, chemistry and materials science
X. Zhao and R. Kopelman 69

Simple image-dipole method for photon scanning tunneling microscopy
W. Jhe and K. Jang 81

A model for the mechanism of field interaction at silicon AFM tips in photon tunneling transfer
J.-P. Fillard, M. Castagné, C. Prioleau, M. Benfedda and J. Bonnafe 85

Optical guidance of neutral atoms using evanescent waves in a cylindrical-core hollow fiber: theoretical approach
H. Ito, K. Sakaki, T. Nakata, W. Jhe and M. Ohtsu 91

EXPERIMENTAL CONTRAST METHODS

"Tunnel" near-field optical microscopy: TNOM-2
B. Hecht, D.W. Pohl, H. Heinzelmann and L. Novotny 99

Resolution beyond the diffraction limit using frequency-domain field confinement in scanning microscopy
M. Vaez-Iravani and D.I. Kavaldjiev 105

Apertureless near field optical microscopy by local perturbation of a diffraction spot
R. Bachelot, P. Gleyzes and A.C. Boccara 111

New optical near field developments: some perspectives in interferometry
D. Courjon, C. Bainier, F. Baida and C. Girard 117

INSTRUMENTATION AND METHODS

Piezoresistive cantilevers as optical sensors for scanning near-field microscopy
P. Bauer, B. Hecht and C. Rossel 127

Fabrication and characterization of optoelectronic near-field probes based on an SFM cantilever design
H.U. Danzebrink, O. Ohlsson and G. Wilkening 131

Development of an integrated NSOM probe
A.G.T. Ruiter, M.H.P. Moers, A. Jalocha and N.F. van Hulst 139

A novel probe for near field optical microscopy based on luminescent silicon
H. Göttlich and W.M. Heckl 145

Gold-coated parabolic tapers for scanning near-field optical microscopy: fabrication and optimisation
M. Garcia-Parajo, T. Tate and Y. Chen 155

Comparison of mechanically drawn and protection layer chemically etched optical fiber tips
P. Hoffmann, B. Dutoit and R.-P. Salathé 165

Transmitted radiation through a subwavelength-sized tapered optical fiber tip
C. Obermüller, K. Karrai, G. Kolb and G. Abstreiter 171

Thermal/optical effects in NSOM probes
B.I. Yakobson, A. LaRosa, H.D. Hallen and M.A. Paesler 179

Laser heating of near-field tips
V. Kurpas, M. Libenson and G. Martsinovsky 187

An optical tip–sample distance control for a scanning near-field optical microscope
A. Kramer, T. Hartmann, S.M. Stadler and R. Guckenberger 191

Piezo-electric tuning fork tip–sample distance control for near field optical microscopes
K. Karraï and R.D. Grober 197

Study of shear force technique for near-field microscopy with an uncoated fiber tip
B. Vohnsen, S. Bozhevolnyi and R. Olesen 207

New design and imaging concepts in NSOM
A. Lewis, K. Lieberman, N. Ben-Ami, G. Fish, E. Khachatryan, U. Ben-Ami and S. Shalom 215

REFLECTION MICROSCOPY

Multi-detection and polarisation contrast in scanning near-field optical microscopy in reflection
A. Jalocha, M.H.P. Moers, A.G.T. Ruiter and N.F. van Hulst 221

40 nm resolution in reflection-mode SNOM with $\lambda = 685$ nm
C. Durkan and I.V. Shvets 227

Reflection near-field scanning optical microscopy: an interferometric approach
S. Pilevar, W.A. Atia and C.C. Davis 233

Simultaneous reflection and transmission modes near-field scanning optical microscope
P.-K. Wei, C.-C. Wei, J.-H. Hsu and W.-S. Fann 237

Visualization of latent images by reflection near field optical microscopy
O. Bergossi, M. Spajer and P. Schiavone 241

SPECTROSCOPY

Development of a scanning near-field optical probe for localised Raman spectroscopy
D.A. Smith, S. Webster, M. Ayad, S.D. Evans, D. Fogherty and D. Batchelder 247

Design and implementation of a combined scanning tunneling and near-field optical microscope
Y. Chen, M. Garcia-Parajo, Y. Lagadec, N. Essaidi, L. Kadoche, M. Borger and H. Launois 253

The dependence of the symmetry (spin) forbidden photoluminescence of C_{60} molecules on their proximity to metal
I. Yurchenko, E. Burstein, Z. Kazantseva, W. Romanow and L. Brard 259

APPLICATIONS

Development of near-field optic/atomic-force microscope for biological materials in aqueous solutions
H. Muramatsu, N. Chiba, T. Umemoto, K. Homma, K. Nakajima, T. Ataka, S. Ohta, A. Kusumi and M. Fujihira 265

Scanning near-field optical microscopy of fluorescent polystyrene spheres with a combined SNOM and AFM
M. Fujihira, H. Monobe, N. Yamamoto, H. Muramatsu, N. Chiba, K. Nakajima and T. Ataka 271

Detection of fluorescence in situ hybridization on human metaphase chromosomes by near-field scanning optical microscopy
M.H.P. Moers, A.G.T. Ruiter, A. Jalocha and N.F. van Hulst 279

Phase change writing in a GeSbTe film with scanning near-field optical microscope
T. Shintani, K. Nakamura, S. Hosaka, A. Hirotsune, M. Terao, R. Imura, K. Fujita, M. Yoshida and S. Kämmer 285

Investigations of liquid crystals and liquid ambients using near-field scanning optical microscopy
P.J. Moyer, S. Kämmer, K. Walzer and M. Hietschold 291

Near field measurements of optical channel waveguide structures
H.E. Jackson, S.M. Lindsay, C.D. Poweleit, D.H. Naghski, G.N. De Brabander and J.T. Boyd 295

Optical near-field induced current microscopy
K. Karrai, G. Kolb, G. Abstreiter and A. Schmeller 299
